Subject PCB Oil at Emerald Recycling

History: This message has been forwarded.

Hello Dan,

We have another tank of PCB-contaminated oil at our facility located at 1500 Airport Way S. in Seattle. The source of the PCB contamination has been confirmed as El Tech, 2401 Utah St., Seattle WA. The sample from El Tech's tank showed 160ppm PCB 1232.

Emerald will be managing the oil that is currently at Emerald as TSCA oil, and is also working with El Tech regarding management of their oil tank. We will also check with El Tech to see if they are willing to sign a manifest for the contaminated oil. Per our standard procedure, I will provide a report to you regarding the manifest within 14 days, and a summary report once we have received certificates of disposal for the oil from the TSDF.

If you have any questions, please feel free to contact me.
